

# DEMAND REPOSENSE

**TCAP partners with Gexa and offers eligible members the ability to save money by strategically limiting their loads via one of three specially designed “Demand Response” programs.**

 **4CP | 4 Coincident Peak** This program enables participating members to reduce transmission and distribution charges by curtailing load during each of ERCOT’s four 15-minute coincident peak events in June, July, August and September each year.

 **EDR | Economic Demand Response** This program saves members dollars by allowing Gexa to limit their energy consumption during specific periods when real-time market prices are their highest.

 **ERS | Emergency Response Service** This program allows participating members to get paid for voluntarily reducing load by a pre-defined

amount whenever asked by ERCOT to do so. All three programs are administered by Gexa and endorsed by TCAP. Through this partnership, TCAP continues its tradition of helping its members save money by strategically partnering with one of Texas’ largest retail electricity providers.

Leveraging its extensive industry expertise, Gexa determines how your best savings can be realized. They work with you to determine which of the three programs it has designed and implemented will save your city the most money on its energy costs, improve your operational efficiency, and reduce your greenhouse gas emissions.

PROGRAM	SAVINGS	PERIOD	OPTIONAL ?	NOTIFY ?	TEST FREQUENCY	CAN COMBINE WITH
4CP	Monthly TDSP Reduction	Jun / Jul / Aug / Sept	Y	Y	Initial Setup	Yes, w/ EDR
EDR	Additional Revenue	Year-Round	Y	Y	Initial Setup	Yes, w/ 4CP
ERS	Monetize Capacity	3 x 4-Month Periods	N	Y	Per ERCOT	Yes, w/ 4CP
