

WHY GET LOCKED INTO A LONG TERM CONTRACT?

GAME-CHANGING SHP

TCAP'S NEW APPROACH TO PROCURING ELECTRICITY

a better way to buy

Imagine if you had a team of industry experts who put out an RFP every single month for your electricity, then didn't charge you for it. SHP was designed by TCAP to take the fullest-possible advantage of America's positive energy future. SHP purchases energy whenever the wholesale electric market prices are most advantageous. This takes away the risk associated with traditional, long-term, fixed-

price contracts that incorporate risk premiums and carrying charges as insurance against an unknowable future. SHP, on the other hand, is flexible, adapting to market dynamics using an ultra-competitive RFP-like process to procure contracts from a pool of vetted, creditworthy wholesale suppliers over time. The bottom-line is that TCAP members enjoy optimal annual savings combined with budget certainty.
